VIA ECFS – Re: CG Docket 17-59, Order and FNPRM for Robocalls

Dear Ms. Dortch,

On November 28th, 2017 David Frankel, CEO of ZipDX LLC met by phone with Eric Burger, FCC CTO.

Mr. Frankel and Mr. Burger discussed the potential effectiveness of the Order in mitigating illegal robocalls and the risk of blocking legitimate calls. Mr. Frankel reviewed his earlier recommendations regarding how affected callers should be informed that they have been blocked. Mr. Frankel stressed the importance of moving forward with a next phase of illegal robocall mitigation that focuses on stopping the calls at their source, including near-term efforts to make spoofed calls traceable as a prelude to the longer-term deployment of STIR/SHAKEN.

References were made to the Order adopted on 16-November, and to the Comments submitted by ZipDX on 27-June 2017 and to the 7-November ZipDX ex parte presentation to Zenji Nakazawa in Chairman Pai's office.

Regards,

/s/

David Frankel
